

The Windermere Leadership Program offers active, involved, community-minded students in Grades 8 through 12 a unique opportunity to combine academic, outdoor, service and leadership learning. Visit www.windermereleadership.org for more detailed information about the program.

Leadership is a five-year program designed to provide these challenges and opportunities to students in the classroom, the community, and in our natural environment. Students that attend our program are part of a community network that prioritizes social responsibility, environmental stewardship, and community engagement. Throughout the program, students fully participate in a variety of school, community, and outdoor activities that provide them with a diverse range of experiences. It is through these experiences that students learn to be active citizens. Our inclusive approach and ability to engage the community have made our classroom a dynamic place for learning while providing opportunities for students to get involved in many vital issues.

Highlights of the program include:

- Multi-day outdoor education trips such as hiking, cross-country skiing and cycling.
- Student-organized events such as the Earth Day Parade and the C3 Climate Justice Conference.
- Enriched educational opportunities on social and ecological justice both through regular classes and specialized Leadership and Sustainability courses.
- Support for students' individual passion projects from skilled mentors in the school and the community.

Administering School: Windermere Secondary School

Location: 3155 E. 27th Ave., Vancouver, BC, V5M 1Y5

Grades: 8-12

District test required: No
