Restart District Facility Rentals

The health, safety and well-being of students and staff continues to be a top priority. Following the updated [health and safety guidelines](#) from the B.C. government, the Vancouver School District will restart district facility rentals for historical user groups. New users will be accepted subject to availability.

School grounds, courts and play structures continue to be available for casual use by the public outside of school hours; However, during school hours, school property is exclusive used for students and staff. Community coaching and organized activities on school grounds (fields, blacktop, uncover areas, parking lots) is only permitted with a valid rental contract.

Those who use school grounds, courts and play structures are encouraged to follow public health and safety measures including washing or sanitizing hands before and after use, as well as spreading out in the space. For more information about health and safety guidelines, read the [B.C. Restart Plan](#).
