OVERVIEW OF ALTERNATE AND ALTERNATIVE EDUCATION PROGRAMS IN VANCOUVER SCHOOL DISTRICT (39)

The Vancouver Board of Education (School District No. 39) provides a variety of pathways for students to reach their graduation goals. The majority of students will attend their neighbourhood school. The Board believes that the neighbourhood school is central in meeting the educational needs of most students, it recognizes that students, parents/guardians, community members and school staff may request an alternative educational setting to support students on their pathways to success.

The Vancouver School District is home to 7 District Alternative Programs, 15 VASS Programs and 1 co-managed program (City School) in addition to Adult Education Centres for youth and adults. The purpose of this handbook is to familiarize you with the variety of programs, supports, and services that exist in the district's alternate and alternative educational settings.

District Alternative Programs:

District Alternative Programs provide an environment that includes additional support for students while ensuring a high level of academic rigour and student accountability. Using a strengths-based approach, teachers employ a variety of instructional methods designed to engage reluctant learners and meet the individual educational needs of each student. Students work from an Individual Education Plan (IEP) that is co-developed with parents/guardians and program staff to address the academic, behavioural, social-emotional and/or mental health profile of each student. The foundation of alternative programs is the positive, mutually respectful relationship between students and the program's staff. We understand this to be essential to student success.

Each District Alternative Program offers an application package detailing information regarding the referral process. Please contact your neighbourhood school counsellor or administrator, or the programs directly to obtain an application. Parents/Guardians will be notified directly from the program staff concerning the status of applications. The application is also available at https://www.vsb.bc.ca/student_Support/Alternative_Programs/ReferralForm/Pages/default.aspx.

The district employs one District Youth and Family Worker to support students/families who have become disengaged from the educational system and who require school and program placement at the secondary level.

VASS – Vancouver Alternate Secondary School:

Most of the VASS Programs are Inter-agency programs jointly funded by the Ministry of Education and the Ministry of Children and Family Development (MCFD). These VASS partnership programs are for students who require additional supports beyond what the District Alternative Programs can provide. The focus of the Inter-agency programs is to deliver intensive support to move students away from an at-risk track, which may affect their learning, interpersonal relationships and /or personal adjustment over a prolonged period.

Referrals from an MCFD or VACFSS Social Worker or a Probation Officer are emailed to the MCFD Youth Services Community Liaison. Referrals are accepted on an on-going basis and reviewed bi-monthly by a joint-partners screening committee to determine eligibility, placement and priority.

Referrals for Spectrum, West, Total Education and Foundation are through the online application, https://www.vsb.bc.ca/student_Support/Alternative_Programs/ReferralForm/Pages/default.aspx.

VCH provides outreach services to all Vancouver Alternate Secondary School programs..

Adult Education Centres:

The Vancouver Board of Education currently operates two Adult Education Centres open to youth 16 years of age and older. Students must be 16 years of age as of July 1st of the current school year. These Centres provide educational opportunities ranging from beginning literacy to secondary school completion, as well as upgrading opportunities for students who have already graduated. The emphasis of the Adult Education Centres is on providing flexible and accessible programs. Students can enroll on an ongoing basis and programs are designed and adjusted to meet individual learning needs.

To register for the Youth Program, potential students are required to meet with the instructor or the designated Youth Program Advisor. A referral from a counsellor or administrator and completion of an English and Math assessment may be required before joining the program.

The South Van Learning Centre operates in partnership with Milieu Family Services

Program Description:

The South Vancouver Learning Centre Program addresses the needs of students who have an extended history of non-engagement in school. Students are aged 13 to 16 years old and are working on Grades 8 to 10. The program is designed to assist the youth who would benefit from extra support in a small group setting to obtain academic credits. The South Van Learning Centre Program employs a team approach that includes but is not limited to school staff, social worker, probation officer, parent/guardian, mental health worker and/or one-to-one worker to help students be successful.

Student progress is managed through the Individual Education Plan (IEP) process, which involves the student, the parent/guardian and program staff. South Van Learning Centre students can complete grades 8 to 10. Adaptations and modifications are made where necessary to meet the needs of the students. Direct instruction is provided to address potential learning gaps in students' literacy and numeracy skills. In addition to the academic component, students may be engaged in recreation, social and life skills activities. Transition Plans will be developed to provide a transition to a secondary school, senior alternative program, to a career training program or employment.

Referral Process:

Referrals from MCFD or Indigenous delegated agency Social Worker or Probation Officer are emailed to the MCFD Youth Services Community Liaison. Referrals are accepted on an on-going basis and reviewed by an MCFD/VSB screening committee to determine eligibility, placement and priority.

Telephone: 604-713-5722

Program Description:

Spectrum is a semester senior secondary alternative program designed for students who have completed Grade 9 and are between the ages of 15 and 18.
