

Message to parents/students – Friday, September 18, 2020

Schedule for students Monday, September 21-Friday, October 2.

On Monday, your child will be attending their **1-2 class in school** – either in the morning cohort or the afternoon cohort. They will attend 1-2 in-school for the next two weeks.

If your child does not know which cohort they are in, they can look at their MyEd schedule. Please see the attachment if you require instructions on how to do this.

Student “homework” and attendance

Students are being faced with major changes to their schooling – both the out-of-class, unsupervised component to their learning and the pace of the learning in a 10 week course.

We appreciate and acknowledge that this is a challenge.

While attendance and work completion have always been important, they are crucial to success in these circumstances.

Please help your child set up a schedule and plan for work completion and emphasize the importance of being on time to class. The morning class begins at 8:40 am. The afternoon class begins at 1:18pm.

The key questions for the student are:

“What exactly do I have to do?”

“How long will it take to do this?”

And...”what is the first step I need to take to do this.”

Depending on the grade level and course, the time demands will vary. Students should be contacting their teacher with questions or difficulties they are encountering with their work.

Student Daily Health Assessment:

Please see an updated Student Daily Health Assessment. The new assessment focuses on the most common Covid symptoms and no longer includes less common symptoms that are also

very general, such as headaches, fatigue, etc.. The Provincial Health Office is trying to be vigilant about preventing the spread of Covid while also not wanting to keep kids home because of minor and general symptoms that are likely not related to Covid. Please review the updated self-assessment and complete this assessment daily with your child. Note that the guideline still indicate that you should keep your child home if they have a fever. If they have no fever, keep them home if they have two or more of the other symptoms. If your child has symptoms and you need advice on next steps, please consult your doctor or call the Healthline by dialing 811.
