

DT STUDENT COUNCIL CANDIDATES

2020-2021

GRADE 10 REPRESENTATIVE

Jocasta Pham

My name is Jocasta Pham, and I am in 10th grade. I am a typical high school student who likes to work hard and socialize with my friends. The biggest reason why I want to run for the Student Council is because I love to make school enjoyable for myself and my fellow peers. It also gives me a chance to make a change in our school environment and learn from the experiences, as well. When I first came to David Thompson, I instantly felt welcomed. I love the kind students and staff members at DT, and therefore I want to contribute to the friendly community! One of my prime ideas for an online school activity is a TikTok challenge! As you might know, TikTok is a very popular app that many students have used over the past few months, and I think it will be a great idea to utilize the app so students can connect amongst one another and be creative! I believe I will be of benefit to the council to ensure the students are assisted and expressed in school activities.

Selina Wu

My name is Selina Wu, and I am in grade 10. I am an ambitious person; however, my procrastination gets the best of me. Personally, it pushes me to work even harder. I am reserved and quiet but will not hesitate to speak up and take initiative if I find something is wrong. Not to mention, I am very friendly and approachable. I want to run for Student Council because I believe that Council is a fundamental part of our school community. Student Council has the authority to make a change in the atmosphere of the school, to make the school a better place where everyone wants to be. It is also an extension of the students' input and voices. David Thompson has become my family in these short two years. From the moment I walked in, I was welcomed with open hands, and that is what I like most about Thompson. It is how friendly and supportive the people can be. Things I would like to see implemented this school year are events that will get people engaged while promoting healthy distancing. Some of these events include online gameshows like kahoots, movie nights, and even online talent shows.

Johnson Le

Cheers guys! My name is Johnson. For starters, I am currently in grade 10, 15 years old. I would love to take on a path as a member of student council for many reasons. One of them stemming from my personal experience of student council's events. Although a lot of the festivals and games were fun, I feel as though they were lackluster in terms of placement. We should increase the amount of activities around the year and allow some more flexibility with the schedules. Utilization of student council's account on social media was a great way to promote events and get connected with students. Let us bring it back up running with even more news and content for our school. I want to promote donating, volunteering, and healthy-being. For some events, winners can choose their charity of choice to donate to. We can host many virtual events: baking competitions, spelling bees, video games, graphic designs, maybe even a photography challenge. Oh, and let's get pandemic life photos too. Some socially distanced events can be bicycling, volunteering, or community garbage cleanups. More to come. Let us brainstorm in the meeting!
