“PROUD TO BE HAWKS”

Honest, Attitude, Working Hard, Kind, Safe

April 24th, 2020

Acknowledges that we live, work and play on the unceded and traditional territories of the Coast Salish peoples – sḵw̓xwú7mesh (Squamish), seli̓l̓w̓it̓lh (Tseil-Waututh), and x̓məḡk̓əy̓əm (Musqueam) Nations

We Miss You - Be Safe

Nightingale Staff are working really hard to ensure that students continue to feel connected and receive educational experiences, albeit remotely. Please be mindful that work posted online is there for students to choose from and work on at their own pace. BC Ministry of Education has suggested students should spend 5-7 hours a week learning from home with a focus on building literacy and numeracy skills. This translates to **60 minutes per day**. **Remember that these are guidelines and please use your discretion on what works best for your child and family.** Equally important are the competency skills that students are developing: communicating, thinking independently, thinking critically and creatively. To our parents/guardians and students, thank you for your patience **and your courageous efforts!!**

Lesson on Symmetry- Ms. Gelson

What do you think? No.1

By Jade (Div.4)

If I was an animal frolicking in a museum I would wonder what I am doing frolicking around an empty museum. And if I saw humans dressed up as a dinosaur I would probably run back to my home where they keep my cage. So, I can hide and maybe lock the cage and explore the museum and slide on my belly. In the museum I could play tag and game like tag and wonder around and have breakfast and relax with my friend. I would look at the other animal and see all the different animal and see how they are doing because maybe they are mad or sad. Maybe they want to talk to someone or they just want to talk about their day. I just want to check in for safety.

Lesson on Symmetry - Ms. Geson's Div. 5

Complete your own symmetry challenge with found objects around your house. Symmetry is when an object looks the same on one side as it does on the other. It's like making a mirror image. To check if something is symmetrical, you could draw a line right down the middle and both sides would look the same. Butterfly wings are symmetrical.

You can use a piece of string or yarn to show the middle but you don't have to. Post your photos in your channel and also post them in our Math sharing channel.

Make yours big or work small but try to spend at least 20 minutes building.

Mr. Yuen's Div. 4 – Get Creative

Div. 4 reviewed news article from <https://www.dogonews.com/2020/3/25/animals-frolic-in-the-absence-of-humans> about how things have changed at public attractions such as museums and aquariums. We discussed how the product of people staying at home has had positive or amusing impacts in different areas on our planet, and used this to come up with some creative stories from the perspective of the other inhabitants of our world.

The Museum by Sam-Div. 4

Once, the land was peaceful and nice, with the best museum ever. The museum guide Krindle was very nice, and the museum had the BEST history! But what no one knew, not even Krindle, was that at night the museum (the animal section) comes to life! **NO ONE KNEW!** Isn't that crazy!?!?! The museum's animal section was cursed! One night, Krindle went in the museum. An animal was missing! It was a bird! The bird was flying near the roof! Krindle was so shocked he fainted. The next day he woke up feeling exhausted. His boss was hovering over him. He yelled at Krindle "GET BACK TO WORK!" Krindle went back to his tour guide work and wondered why he had seen the concrete bird sculpture flying around. He returned the next night to see what was really going on. When he went back he saw turtles on the floor, multiple birds flying around and even a lion! The lion pounced on him and knocked him out. He woke up in front of his boss again who yelled "GET BACK TO WORK! SLEEP AND WORK DO NOT BELONG IN THE SAME SENTENCE!!" On the third night he returned to the museum. Suddenly, he saw a glowing orb with multiple colors flying inside of it. The orb quickly shot towards him. It was the spirit of the wizard that cursed the museum! He took the body of Krindle and returned the museum to normal except now everything came to life at day. Then his boss and all of the people he worked with were amazed and they turned it into the animal fun museum.

ART AND DISCOVERY STUDIO - THANK YOU MAGGIE!

We are so excited to see children displaying their art works at our art gallery located at the front of our school. Maggie and I invite you to view the AIRS (Artist in Residence Studio Program) website that is currently showcasing the Art and Discovery Studio at Nightingale. Division 10 has been highlighted through photos and text. Please take the time to view. We would love comments about the studio as this program relies heavily on parent and student feedback and support.
